

Matthew Johnson

We were very privileged to have this talented magician lecture at the Middlesborough Circle of Magicians at the beginning of his Tour of England. Matthew lives and works in Canada but has also spent time touring on cruise ships and in the Far East.

All of the effects that he performed were clean and in the main very simple but like most things that are simple they were very powerful. I personally liked the use of music as an accompaniment to some of his routines.

He favours the Big Band style which worked extremely well and I particularly liked his Sponge Ball routine and his spin on the classic Magic Rings. This has again tempted me to consider purchasing a set but alas will I use them? Possibly not but the idea is still there.

This was a great night of magical entertainment and ideas. In my opinion they are the necessary requirements for any lecture if you missed it you missed a treat.

Mike Lee
